

The Ngomza is a wireless recessed downlight loudspeaker with an integrated digital amplifier, supplied with a ceiling cup for suspended mounting. The music is received wirelessly from the SMARTplayer at a distance up to 75 meters away. Any number of loudspeakers can be used. The volume of each individual loudspeaker can also be adjusted by remote control during the operation. The special paint finish ensures an elegant scratch-resistant surface structure.

KEY FEATURES

- 1,9 GHz n-DECT
- 360° Sound
- Integrated amplifier
- 40W RMS
- NewTec KA10 loudspeaker 50W 4Ω
- Speaker colour options: White / Black / Custom on request
