

SMARTPLAYER

PRODUCT SPECIFICATION SHEET

Audio & Visual

LL
SA

CATEGORY: WIRELESS AUDIO TRANSMITTER

The SMARTplayer is the smart control device for all NewTec speakers, creating an interference-free wireless connection between the audio source and NewTec SMART loudspeakers. Audio can be fed in via analogue or digital input over the network, with any number of SMARTplayers controlling any number of loudspeakers in parallel. The signal transmits at 48 kHz/16-bit in the 1.9 GHz band via two directly installed antennas, giving stable, latency-free playback up to 75 metres, and can be operated via the supplied remote control or the NewTec app.

KEY FEATURES

- HiFi quality
- Range up to 75 m
- Stable transmission via 1,9 GHz
- Control via NewTec App
- Link to NewTec Cloud service
- Audio input via network

SOUND SPECIFICATIONS

Radio frequency	1,9 GHz n-DECT
Music transmission	48,000 Hz / 16 Bit (20 Hz - 20 kHz)

GENERAL SPECIFICATIONS

Colour	Black
Dimensions	140 x 40 x 115 mm
Material housing	ASA painted
Weight	240 g
Power supply	AC 100-240 V / DC 5V / 1A
Power connections	Power supply unit (included in scope of delivery)
Connections	LAN: Ethernet port RJ45, 100Mbit/s; RCA Stereo IN (RCA)
